ABOUT ME

MERN Stack Developer proficient in building modern web applications with a focus on user-centric design and seamless functionality. Skilled in React.js and Zustand for state management, Tailwind CSS for efficient styling, and material-UI for creating intuitive and visually appealing interfaces. Extensive experience in integrating frontend components with backend technologies like MongoDB, Express, and Node.js to deliver robust and responsive applications. Committed to crafting pixel-perfect user experiences through meticulous attention to detail in CSS and UI design. Passionate about staying current with the latest web development trends and delivering high-quality code that meets project goals. Worked on API creation with Mongo DB Aggregation, express router, etc.

SKILLS

Expertise

■ HTML ■ CSS ■ JavaScript ■ Tailwind CSS ■ React.js ■ Zustand ■ Node.js ■ Express.js
■ MongoDB ■ Git ■ GitHub ■ Vercel ■ Render.

WORK EXPERIENCE

Web Developer

Enigmatix [06/11/2023 – 07/2024]

City: Bhawalpur | Country: Pakistan

Frontend Development

- Develop seamless UI, using React.js and Tailwind CSS.
- Write clean, modular, and maintainable code following best practices.
- Built reusable and optimized components for future use and best performance.
- Manage application state using libraries like context API, Redux, and Zustand.
- Connect frontend application with RESTful APIs by using Axios.

Backend Development

- Create and maintain RESTful APIs using Express.js.
- Write server-side logic using Node.js.
- Create middleware to check the user authenticate for specific request or not.

Database

- Integrate and manage database i.e. MongoDB.
- Design efficient schemas for storing and retrieving data.
- Perform CRUD operations, and optimized queries.

Version Control and Debugging

- Collaborate with team members using Git and GitHub.
- Identify the bugs in both client side and server side.

Learning and Adaptation

- Stay updated with the latest tools, libraries, and frameworks in MERN stack.
- Adapt to project-specific requirements and coding standards.

Assisting Senior Developers

- Support senior developers in integrating complex features.
- Perform assigned tasks within the deadlines.

PROJECTS

Full Stack Real-time Chat Application

- Developed full-stack real-time chat application using the MERN stack and socket.io.
- Created features such as multiple themes, user authentication, send and receive text and images, update profile pic etc.
- Worked on backend API Creation with Mongo DB aggregation for users, and messages data management.
- Also use socket.io for real-time chat between users.

Full Stack E-commerce Application

- Developed full-stack e-commerce platform using the MERN stack.
- Implemented features such user authentication, and Admin Dashboard for products listing, analytics etc.
- Also implemented stripe payments.

Recipe Finder App

- Developed a recipe finder application using third party API. It searches for different recipes and also add them to favorites.
- And all fetched items when clicked navigated to that specific video on YouTube.
- Use TheMealDB API for fetching data and also store it into local storage for favorite section.

Personal Portfolio Website

- Developed a responsive and visually appealing portfolio website to showcase personal projects, skills, and achievements.
- Utilized technologies, i.e. React and Tailwind CSS to design and implement features like interactive navigation, project galleries, and contact forms.

EDUCATION AND TRAINING

BS Zoology

The Islamia University of Bahawalpur [01/10/2019 – 01/10/2023]

City: Bahawalpur | Country: Pakistan | Website: <https://www.iub.edu.pk/>

DIGITAL SKILLS

Microsoft Powerpoint / Microsoft Office / Social Media / Microsoft Excel
